Achieve the winning look with **Albedor** cabinet doors

OUR COMMITMENT TO QUALITY

Albedor Industries Pty Ltd Code of Ethics

At all times, customers will receive prompt, courteous service, and value for money.

We aspire to provide the highest standard of design, workmanship and service.

We provide a safe and friendly work environment.

Strict adherence to recognised industry practices.

Constant commitment to design and product development.

Quality

Albedor Industries is an Australian family business which has been manufacturing quality cabinet doors and panels since 1979.

At Albedor, we've built our success on a simple philosophy: never compromise on quality and style.

The use of materials of excellent quality combined with the latest technology, enable Albedor to produce doors and panels to an exceptional standard.

Albedor is well known in the cabinet making industry for our stable lead times and consistent output, which makes it an attractive proposition for cabinet makers, builders and architects who need to know their products will be available as planned.

Guarantee

Albedor Industries True Reflections doors are covered by an express warranty in the terms below.

This warranty is provided by Albedor Industries Pty Ltd (“Albedor”) ACN 007 136 521. The benefits under this warranty (including its express duration) are in addition to and not intended to limit any other rights or remedies of consumers under a law in relation to which the warranty relates.

Albedor Industries Pty Ltd warrants that the door product is substantially free from defects for a period of 7 years from the date of first installation of the door. To the extent permitted at law, and subject to the following paragraph, Albedor Industries will, at its election repair or replace goods that are defective.

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to replacement or refund for a “major failure” and compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if goods fail to be of acceptable quality and the failure does not amount to a major failure.

The term “major failure” is defined in the Australian Consumer Law and includes but is not limited to where the goods are substantially unfit for the purpose for which such goods are commonly supplied and cannot easily and within a reasonable time be remedied to make them fit for such a purpose, or where the goods are unsafe.

The warranty does not cover defects or problems that arise due to you or any person installing the product (other than Albedor) causing the product to become of unacceptable quality, such as failure to take reasonable care of the product or damage caused by abnormal use or installation of the product.

For warranty to be honoured you must:

- Contact Albedor Industries by mail, phone or email as follows:
7 Research Drive, Croydon South Vic 3136
PO Box 1264 Croydon Vic 3136
Ph: 03 9761 6330
email: albedor@albedor.com.au
- Submit proof of purchase: and
- Bear the costs associated with making the warranty claim (such as the sending in of proof of purchase).

We will then make a determination as to refund, replacement or repair in accordance with the above.

TrueReflections

REFLECTIONS

True Reflections by Albedor is the ultimate in mirror finish gloss surfaces.

True Reflections features the latest in European style and is the ideal choice for high gloss finishes in cabinetry, kitchens, shopfitting and other internal vertical surfaces. As well as being hard wearing and durable, True Reflections is a polishable surface – minor scratches and marks can be polished out, ensuring a perfect mirror reflective finish for the life of your project.

True Reflections is available in a comprehensive range of plain and exotic colours. Doors and panels can be finished in feature, contrast and complimentary edgeband. The combinations of colours and edgebands is endless and allows for a creative and individual look.

True Reflections doors and panels are available in custom door sizes, various lengths and thicknesses of MDF substrate including 18mm E0 MRMDF, which complies with AS/NZS 1859.2 standards for low formaldehyde content.

This contemporary kitchen features True Reflections Scarlet doors and drawers. The uniquely angled main benchtop is certainly avant garde, made from stainless steel placed on an approximate 17 degree angle, it creates a unique dynamic to the kitchen space. The benchtops are matched with stainless steel appliances and handles, brushed aluminium kickboards and bespoke black metallic glass splashback.

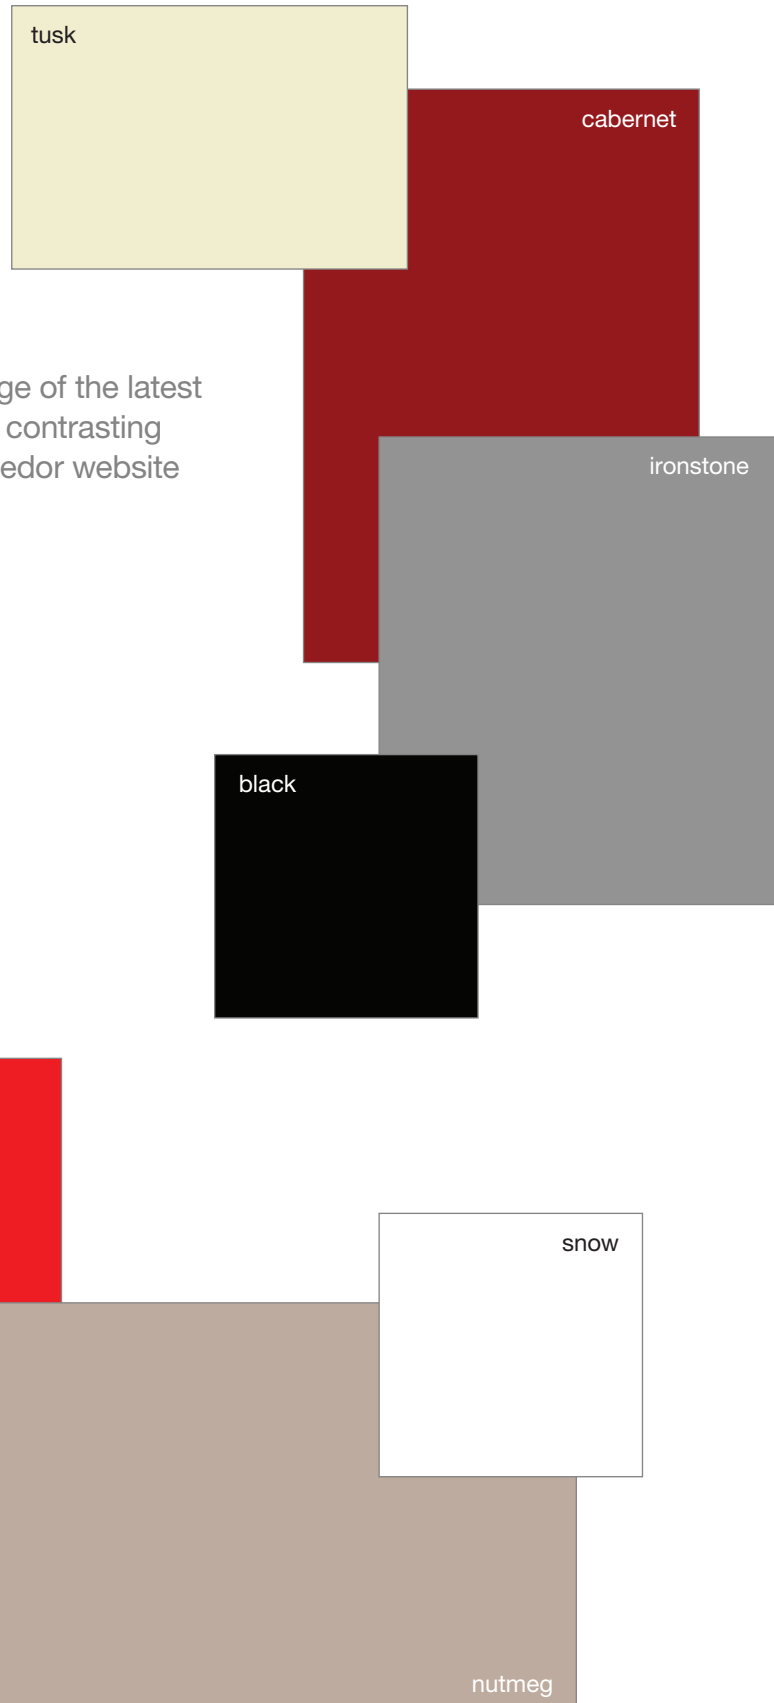

This stunning art-deco inspired kitchen features True Reflections Black doors and drawers. The dramatic polished jarrah timber floors, stainless steel appliances and silver metallic glass splashback provides the instant wow factor. The latest trends from Europe are clean lines, high gloss finishes and bold colour choices.

Pure – fresh and white, True Reflections Snow doors are featured in this stunningly beautiful kitchen. The handle free doors and drawers create a streamlined appearance, combined with black porcelain floor tiles and brushed aluminium kickboards, providing the perfect contrast to the snow white cabinetry.

Colour Selection

inspire | select | create

Albedor offers an extensive range of the latest colours with complementary or contrasting edgeband – please visit the Albedor website for further product information.

www.albedor.com.au

The design of this kitchen features a clever use of contrasts of True Reflections Snow and Black. Black overhead doors, offset by fresh white Snow doors and drawers, creates a balanced feature wall within the kitchen. The dramatic dual tone effect is further enhanced with the inclusion of stainless steel appliances and the warmth of the timber flooring. The light reflecting elements used in this design, including high gloss cabinetry, mirrored splashbacks and aluminium kickboards contribute to the overall impression of the area and space.

True Reflections Onyx with contrasting Aluline (aluminium) edge was used on all of the cabinet doors, overheads and panels. Its metallic black/gold finish is super reflective and radiates a lively and dynamic effect.

True Reflections Snow with Aluline (aluminium) edge was used to create the seductive high gloss piano finish of the doors and panels. Boasting more than just good looks, it's also user friendly with its clever u-shaped layout incorporating many corner drawers and maximising flexibility and functionality.

This kitchen features True Reflections Black doors combined with rich bamboo features, stainless steel appliances and french black benchtops which have been added for maximum impact. The overall design of the kitchen is sleek and creative with the emphasis on maximising storage and minimising clutter.

Care & Cleaning

'TRUE REFLECTIONS'

To ensure your Albedor doors look as radiant in the years to come as they do today, please follow these simple instructions.

Note: Failure to follow any of the instructions will void the warranty

All doors have a protective coating to be removed only on completion of installation.

The hygroscopic surface of True Reflections will achieve end hardness after approximately one week of exposure to normal air humidity. The hardening process can be accelerated by gently wiping the surface with a solution of 1% liquid soap and water, using a Microfibre Cloth.

For general cleaning, *True Reflections* doors should be cleaned as follows:

Light Stains

Gently wipe down using a damp Microfibre Cloth containing 1% liquid soap and water. Dry using a Microfibre Cloth so as not to leave any water on the door(s). Alternatively, spray surface with Vuplex Plastic Cleaner & Antistatic Polish and wipe over with a Microfibre Cloth.

Maintenance

True Reflections can be polished with Albedor Ultra Gloss Polish and a Microfibre Cloth to remove minor scratches.

To ensure that your Warranty will not be void, **DO NOT** use any of the following on *True Reflections* doors:

Abrasive Cleaners (eg. Ajax, Jif etc), Scouring Pads or Abrasive Papers, Solvents, Thinners, Turpentine (Turps), Ammonia, Bleach, Acetone, Mek and any other cleaning agents containing Organic Solvents or the above mentioned products.

To ensure 100% customer satisfaction of True Reflections doors please adhere to the following guidelines for Storage, Maintenance, Design and Installation.

Your *True Reflections* doors are manufactured from the highest quality materials.

Whilst your doors are made from a highly Moisture Resistant Medium Density Fibreboard (MRMDF) and as with any wood based panel cannot be made totally waterproof, care should be taken to wipe up spills immediately, ensuring the doors are not exposed to high or continuous levels of moisture, steam and humidity.

Storage and Maintenance

- Care should be taken to avoid leaning large doors against the wall with other small doors leaning against it, this could cause additional bowing.
- When stacking doors they are to be stacked face to face.
- Care should be taken not to slide doors while hinging as this could scratch the face.
- The protective coating supplied on True Reflections doors should not be removed until installation is complete after final site clean to reduce the chance of scratching or damaging.
- Avoid contact with sharp items and objects.

Design

Areas where *True Reflections* doors/panels will be used should be designed so that they are not exposed to steam, direct heat or prolonged humidity. When designing a kitchen, care should be taken so *True Reflections* items are

not positioned close to appliances that give off steam (eg. water jugs) and heat (eg. cupboard doors and panels close to a gas cooker).

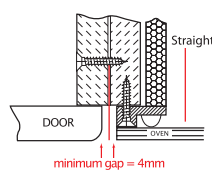

Installation

Flush Mounted and Under Bench Ovens with Front Panel Exhausts. Many ovens on the market do not have a fitted 'Baffle' surrounding the oven door, and excessive heat is convected to the surrounding cabinetry and doors/panels.

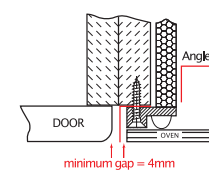

True Reflections doors are manufactured to meet current European Standards for heat resistance (UNI9242), which requires the door to withstand a temperature of 70°C for 4 hours.

When ovens convect heat greater than 70°C, Albedor recommends that heat deflector strips, which are available from door manufacturers, to be installed for ovens of this nature (see diagrams below)

Method 1

Method 2

Failure to install heat deflectors in either above method where required will void the warranty.

Cooktops and Rangehoods

Doors and end panels should not be installed in close proximity (less than 650mm) to a cooktop. When doors and panels are installed around a cook top in accordance with above, a 900mm DUCTED rangehood exhaust should be installed (recirculating rangehoods are not recommended).

Hot plates should not be used without the rangehood exhaust fan being switched on.

Retractable rangehoods must also be turned on and the panel pulled out to the full extension - otherwise they convect heat through the sides and directly onto doors/panels.

Appliances such as electric fry pans and portable electric grills should only be used under an activated rangehood exhaust fan. Similarly toasters used in proximity can have the heat build up reduced by activating the exhaust fan.

A cool down period is recommended after long use to prevent any heat build up close to panels/doors.

Failure to use the rangehood or follow any of the above guidelines will void the warranty on doors and panels.

IMPORTANT NOTE:

To ensure your warranty will not be void, this Care Instructions sheet must be forwarded on to the end user.
