D

Please Specify: 1) Kick Height
2) Double Mid Rail

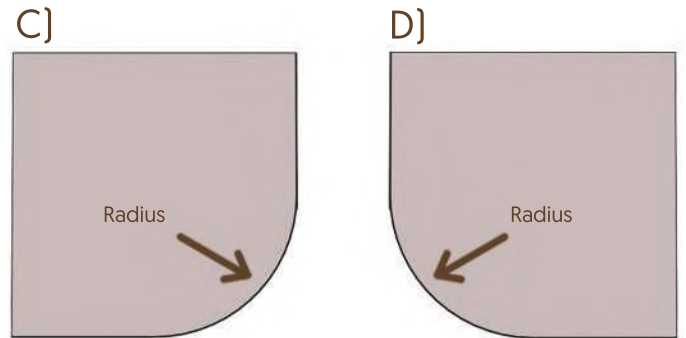

Shelves

Angle Shelf

Please specify size and type [e.g A, B] on order

Radius Shelf

Please specify radius dimensions

Care & Cleaning

Cleaning Procedure for Polyurethane Coated Panels

If any marks appear, please try to remove the mark using the following method:

1

Step 1 - Mix a mild solution of dish washing liquid and warm water.

2

Step 2 - Use in conjunction with a lint free soft cloth to clean polyurethane coated products.

If this does not remove the mark then it is recommended to contact the manufacturer for assistance.

Colour Matching

2 Pac offers an unlimited range of colours.

All colours are matched to paint manufacturers samples.

Colours may have slight variations to samples ie:

- Gloss levels
- Transparent samples
- Plastic samples
- Glass samples
- Paint manufacturers samples may vary between batches

Colour sample to be supplied when matching to any existing paint work.

All colour matching is done professionally and to the best of our ability to give our customers the best colour match possible.
